SRN: PES2UG24CS432 Section: G Name: Samanvith Kashyap

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow customers to submit a commission request specifying type, dimensions, style, deadline, and budget.	High	When a customer fills out and submits the commission form, the request is routed to the selected artist's dashboard.	Core function to initiate the commission process.
FR-002	Functional	The system shall allow the artist to either accept or reject an incoming commission request.	High	The artist's dashboard displays "Accept" and "Reject" buttons; clicking "Accept" prompts the customer for payment.	Required for artists to manage their workload.

FR-003	Functional	The system shall automatically generate and apply a watermark to the artwork preview uploaded by the artist.	High	When an artist uploads a preview file, the system renders a visible watermark over the image before displaying it to the customer.	Protects the artist's uncompensated work.
FR-004	Functional	The system shall allow the customer to review the watermarked preview and either approve it or request changes.	High	The customer view contains "Approve" and "Request Changes" buttons; requesting changes opens a text box for feedback.	Ensures customer satisfaction before final delivery.
FR-005	Functional	The system shall release payment to the artist and provide the customer with the unwatermarked file upon final approval.	High	Clicking "Approve" triggers the payment gateway to transfer funds and unlocks the high-resolution file for customer download.	Finalizes the transaction securely.

NFR-001	Nonfunc.	The system shall securely protect the original, unwatermarked high-resolution artwork from unauthorized access.	High	Unwatermarked files cannot be accessed via direct URL by the customer until the "Approve" trigger is fired.	Prevents art theft.
NFR-002	Nonfunc.	The system shall apply the watermark to the preview image and render it for the customer in under 10 seconds.	Medium	A timing log shows < 10 s from the artist clicking "Upload" to the watermarked image being available.	Ensures a smooth user experience.

Use Case: Review and Approve Artwork

Primary Actor: Customer

Main Success Scenario:

1. System notifies the Customer that a watermarked preview is ready for review.
2. Customer logs into the platform and opens the commission dashboard.
3. System displays the watermarked artwork preview.
4. Customer reviews the artwork and selects the "Approve Final Artwork" option.
5. System prompts the Customer to confirm their final approval.
6. Customer confirms approval.
7. System signals the external Payment Gateway to release the escrowed funds to the Artist.
8. System unlocks the original, high-resolution artwork file.
9. System provides a download link to the Customer for the unwatermarked art.
10. Use case ends successfully.

Alternate Flow: 4a. Customer Requests Changes

- **4a1.** Customer selects the "Request Changes" option instead of "Approve".
- **4a2.** System displays a feedback form.
- **4a3.** Customer inputs their requested modifications and submits the form.
- **4a4.** System notifies the Artist of the requested changes.
- **4a5.** The flow pauses until the Artist uploads a revised preview, returning the scenario to Step 1.
